

# EMERGENCY STATION RANGE FOR MEDICAL FLUIDS

## MAVO 2

Emergency station for vacuum, air and oxygen supply

## MOBILE MAVO

Emergency system for vacuum, air and oxygen supply

## Technologies & applications

VACUUM PUMPS

AIR COMPRESSORS

	Technology	Applications
EVISA	Lubricated rotary vanes	Medical vacuum
SIRELLA	Oil-free claws	Medical vacuum
KAV	Oil-free turbine	AGSS Dental vacuum
ANTIGUA	Liquid-Ring	Laboratory vacuum
VIGIFLUID	Communication Remote monitoring	Vacuum Air O <sub>2</sub>
SCROLL	Oil-free scrolls	Medicinal air Technical air Dental air
SCREW	Lubricated screws	Medicinal air Technical air O <sub>2</sub> generator
PISTON	Oil-free and lubricated pistons	Medicinal air Technical air Dental air

## Mil's : french manufacturing since 1926

### Men :

100 people on 2 sites in the outskirts of Lyon, for a surface of 15 000 m<sup>2</sup>, one sales office in the east of Paris and sales technicians at your disposal.

### Technics :

State-of-the-art computer assisted design software.  
A design department of 12 persons.  
A traceability system typical of those used in automotive industry.

### Production :

Machining and assembly of pumps and systems in our 2 sites.

### Products :

A wide range of centralized vacuum, air and oxygen systems for on-site production. Installations well-known all around the world for their fiability and long lasting performances even under difficult environments.  
In compliance with ISO and BS Standards.

## Mil's at your service

### With our advice :

Our specialised Sales Engineers will help you to choose the appropriate products regarding your needs.

### With a relevant training :

You will be trained on the maintenance of your products with customised modules in our premises or yours.

### With the maintenance agreement :

Our 5 after-sales technicians will free you from all your worries about the upkeep of your machines.

### With the follow-up of our spare parts :

We will help you keep our machines running for many years.

# MIL'S, on-site production of medical fluids

Since 1926

# CENTRALIZED VACUUM

Lubricated and oil-less technologies

**HOSPIVAC® G**  
Modular plant from 1 to 6 pumps  
with lubricated rotary vane vacuum pumps

**HOSPIVAC® V3 EVISA**  
Triplex plant with lubricated rotary  
vane vacuum pumps

**HOSPIVAC® V3 SIRELLA**  
Triplex plant with oil-less  
claw vacuum pumps

**ANAESTIVAC 2 - AGSS**  
Duplex plant for anaesthetic waste  
gases scavenging, oil-free pumps

**MINIVAC 3 PS**  
Triplex plant with oil-free  
piston vacuum pumps

## special laboratory

**LABOVAC 2**  
Duplex plant with liquid  
ring vacuum pumps

**CRYOLIS**  
Plant with lubricated rotary  
vane vacuum pumps  
and cryogenic condensers

# MEDICINAL AIR

Lubricated and oil-less technologies

**HOSPITAIR® PACK**  
Compact design plant with  
lubricated screw compressors

**HOSPITAIR® SCROLAIR PACK D**  
Modular plant with oil-free  
scroll compressors

**HOSPITAIR® G AM**  
Modular plant with lubricated  
screw compressors

**HOSPITAIR® C**  
Composite cabin for outdoor  
installation

**AIRMIL'S 2**  
Duplex plant with lubricated  
piston compressors for technical air

# ON-SITE OXYGEN PRODUCTION

PSA and VPSA technologies

**HOSPITAIR® PACK S**  
Compressed air plant  
for PSA oxygen generator

**PRO<sub>2</sub>XY®**  
PSA oxygen generator

**OX HP**  
High pressure oil-free  
pneumatic booster

**SKID HP**  
High pressure filling  
of oxygen cylinders

**PRO<sub>2</sub>XY® VAC**  
VPSA oxygen generators

## OXYGEN CONTAINER

Air compartment

Oxygen compartment
